

# MACRO SYSTEM

## MacroSystem US Software Version Guide

This guide is meant to help provide information about the various software products available from MacroSystem. This includes details on what is the latest version, if there is a manual or not, and if the product is HD capable. We've assembled this guide to the best of our knowledge. If there is an error or omission found, please let us know and we can update and correct it.

Please note some versions of software may have two version numbers. The first one is usually an indication that it is for machines that run Smart Edit software.

The second number would be the version you would use if you were running Bogart SE. Not all Add On software products have a blocking message to tell you it's a Bogart only product, so be sure to activate the correct version on your system.

Under the "Manual" section, you will see some products that don't have a printed manual. Some products are listed as "info button," these products would use the little "i" button found on the Install Product menu or the individual Effects menus to provide on screen informatio about the selected product and its functions.

<b>Software</b>	<b>Version</b>	<b>Demo</b>	<b>Manual</b>	<b>HD Capable</b>
-----------------	----------------	-------------	---------------	-------------------

### **Operating Systems**

Bogart 5	5.5c	no	printed	yes
